AYAN MANSOORI

Machine Learning Engineer | Data Scientist | Python Backend Developer

Ujjain, India | +91-8889554335 | ayanmansuri535@gmail.com | github.com/ayan501 | linkedin.com/in/ayanmansoori501

PROFILE

Machine Learning Engineer and Data Scientist building end-to-end AI systems from model development to production deployment. Built and deployed TraderIQ, a full-stack AI application integrating Random Forest + XGBoost (92% accuracy) with FastAPI and PostgreSQL. Currently developing Python/FastAPI backend components for AI-driven applications, with hands-on experience in ML model integration, REST APIs, database design, and authentication.

EDUCATION

B.Tech – Computer Science & Engineering *2022 – 2026*
Shri Guru Sandipani Institute of Technology, And Science, Ujjain

Class XII – Science (PCM) *2020 – 2021*
89.90% | Bhatiya Higher Secondary School, Ujjain

TECHNICAL SKILLS

- **Programming**: Python, SQL
- **Machine Learning:** Classification, Regression, Ensemble Methods, Random Forest, XGBoost, Hyperparameter Tuning, Model Evaluation
- **Deep Learning & NLP:** ANN, CNN, RNN, NLP, Transformers
- **Data Science:** Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering, Exploratory Data Analysis
- **Backend & APIs:** FastAPI, REST API Development, Pydantic, SQLAlchemy, JWT Authentication
- **Databases:** PostgreSQL, MySQL, Database Schema Design
- **ML Engineering:** Model Integration, Model Deployment, Model Versioning, Model Monitoring
- **DevOps & Tools:** Docker, Git, GitHub, CI/CD, Render, Vercel

PROFESSIONAL EXPERIENCE

Data Science & AI Intern | Darkiee Tech Pvt. Ltd. *June 2026 – Present*
- Developed REST API endpoints and backend logic using FastAPI for AI-driven applications.
- Built a Movie Collection application with FastAPI and database integration as part of internship development.
- Contributed to the ongoing LumenRead Comprehension project by implementing user authentication and authorization functionality.

Data Science Intern | SkillCraft Pvt. Ltd. *Sept 2025 – Oct 2025*
- Cleaned and preprocessed datasets for model training and retraining workflows, ensuring data quality and consistency.
- Performed feature-importance analysis and translated findings into actionable business reports and recommendations for stakeholders.

KEY PROJECTS

TraderIQ — Trader Intelligence & Risk Analysis *Mar 2026 – Jun 2026*
- Built and deployed an end-to-end AI application for trader performance prediction using historical trading data, integrating a Random Forest + XGBoost ensemble (92% accuracy) with a FastAPI and PostgreSQL backend for real-time inference.
- Containerized and deployed the application using Docker, implementing GitHub-based CI/CD with the frontend on Vercel and backend on Render.

Job Tracker Application *June 2026 – July 2026*
- Designed and developed a RESTful backend for job application tracking, implementing relational database schemas and SQLAlchemy ORM models for users, companies, and applications.
- Developed CRUD APIs using FastAPI with JWT-based authentication and authorization for secure user-specific access.

CERTIFICATIONS

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp — Udemy, Krish Naik / KRISHAI Technologies, June 2026
- The Ultimate Job Ready Data Science Course — CodeWithHarry, September 2025
